BACK-END DEVELOPER (DJANGO)

Enthusiastic web developer with one year of hands-on experience in web development, specializing in backend development using Python and Django. Adept at managing complete project lifecycles and deploying scalable applications.

SKILLS

Programming Languages: Python, HTML, CSS

Frameworks: Django, Django REST Framework, Bootstrap

Databases: PostgreSQL, MySQL, SQLite, MongoDB

Tools: Docker, Git & GitHub, Celery, Channels, Postman

Others: Problem Solving, Data Structure & Algorithms, Deployment

PROFESSIONAL EXPERIENCE

Graduation Project

- **E-Commerce Platform**

Sep 2023 - July 2024

Developed an e-commerce platform with dashboards for merchants, customers, and administrators using Django, Celery, Docker, Redis, and PostgreSQL. Implemented SMTP email for notifications and communications. Successfully deployed the platform, ensuring a seamless user experience and efficient system performance.

Freelancer Projects

- **CRM - Gym**

Jan 2024 - Feb 2024

Designed and developed a CRM system specifically for a gym, featuring an admin dashboard to manage all processes, including Create, Update, and Delete (CRUD) operations. Utilized Django for the backend, incorporated SMTP email for notifications and communications, and managed deployment to ensure efficient and reliable system performance.

- **Blog - Management system**

Apr 2024 - May 2024

Created a blog platform where posts can be created, updated, and deleted. Implemented features for clients to comment on posts. Utilized Django for the backend, incorporating a tags system, authentication system, Django messages for notifications, and SMTP email for communications.

EDUCATION & CERTIFICATIONS

Bachelor of Information system

Major: Web development
